MCA / BCA/ MSc (DS) Project Report – Detailed Writing Guidelines

MCA / BCA/MSc(DS) Project Report – Detailed Writing Guidelines

For Master of Computer Applications (MCA) and
Bachelor of Computer Applications (BCA) and
M.Sc (Data Science) Programs

---

1. Overview

This document provides a standardized academic framework for preparing MCA and BCA and MSc (DS) project reports.

The purpose of the project report is to demonstrate:

• Understanding of software development lifecycle
• Ability to design and implement real-world applications
• Programming and technical skills
• Database design capability
• Problem-solving and system architecture understanding
• Testing and deployment knowledge

The report must be **technical, structured, and implementation-focused** — not merely theoretical.

---

2. Overall Length

Program	Pages	Word Count
MCA Project	60–100 pages	18,000–30,000 words
BCA Project	40–70 pages	10,000–18,000 words
MSc (DS) Project	60–100 pages	18,000–30,000 words

Important Notes

• Word count exclude zes references and appendices
• Screenshots, UML diagrams, ER diagrams, and code snippets are included in page count
• Avoid unnecessary theory — focus on implementation

3. Mandatory Preliminary Pages

1. Cover Page
2. Bonafide Certificate (Institute + Guide)
3. Declaration by Student
4. Acknowledgement
5. Abstract
6. Table of Contents
7. List of Figures
8. List of Tables
9. List of Abbreviations

4. Chapter-wise Structure

Chapter 1: Introduction

MCA and MSc(DS): 5–8 pages
BCA: 4–6 pages

Purpose

To introduce the system, problem, and objective.

Contents

• Background of the project
• Problem statement
• Objectives of the system
• Scope of the project
• Existing system overview
• Proposed system overview
• Technologies used (brief intro)

Writing Tips

• Clearly explain what problem your software solves
• Avoid generic statements like “Technology is growing rapidly”
• Mention real-world relevance

Chapter 2: Literature Review / System Study

MCA and MSc (DS): 8–12 pages
BCA: 5–8 pages

Purpose

To analyze existing systems, technologies, and methodologies.

Contents

• Review of similar systems
• Comparative analysis
• Software development models (Waterfall, Agile, etc.)
• Relevant frameworks / libraries
• Research gap (What existing systems lack)

Important

Do not copy documentation from frameworks. Explain how they relate to your system.

Chapter 3: System Analysis

MCA and MSc(DS): 8–10 pages
BCA: 6–8 pages

Include

• Functional Requirements
• Non-Functional Requirements
• User Requirements
• Feasibility Study

- Technical feasibility
- Economic feasibility
- Operational feasibility

• System Architecture
• DFD (Level 0, Level 1)
• Use Case Diagrams

Chapter 4: System Design

MCA and MSC(DS): 10–15 pages
BCA: 8–10 pages

Required Elements

• UML Diagrams

- Use Case Diagram
- Class Diagram
- Sequence Diagram
- Activity Diagram

• ER Diagram
• Database Schema
• Table Structures
• API Design (if applicable)
• UI/UX Wireframes

Rules

• Every diagram must be numbered (Figure 4.1, Figure 4.2)
• Add explanation below each diagram

Chapter 5: System Implementation

MCA and MSc(DS): 12–20 pages
BCA: 8–12 pages

Include

• Development environment
• Tools & Technologies used
• Hardware & Software requirements
• Module-wise explanation
• Key algorithms
• Important code snippets (do not dump full code)
• Screenshots of application

Important

• Explain logic — not just paste code
• Highlight security features
• Mention version control (Git) if used

Chapter 6: Testing

MCA and MSc(DS): 6–8 pages
BCA: 4–6 pages

Include

• Testing strategy
• Unit Testing
• Integration Testing
• System Testing
• Test cases table
• Bug reports (if any)

Example Test Case Format:

| Test Case ID | Input | Expected Output | Actual Output | Status |

Chapter 7: Results & Discussion

MCA and MSc(DS): 4–6 pages
BCA: 3–4 pages

• Output screenshots
• Performance evaluation
• Comparison with existing system
• Improvements achieved

Chapter 8: Conclusion & Future Enhancements

MCA and MSc(DS): 3–5 pages
BCA: 2–3 pages

Conclusion

• Whether objectives were achieved
• Key achievements
• Technical learning outcomes

Future Scope

• Feature expansion
• AI integration
• Mobile version
• Cloud deployment

Avoid vague statements like:
❌ "The system can be improved further."
✓ "Integrating payment gateway and role-based authentication will enhance scalability."

Chapter 9: References

Minimum Sources
• **MCA and MSc(DS):** 20+ sources
• BCA: 10+ sources

Acceptable Sources

• Research papers
• IEEE articles
• Books
• Official documentation

Avoid:
❌ Blogs without credibility
❌ Wikipedia

Use APA format.

Chapter 10: Appendices

Include:

• Complete Source Code
• Database Dump
• Questionnaire (if survey-based project)

• User Manual
• Installation Guide

---

5. Abstract

150–250 words

Must include:

1. Project title
2. Objective
3. Technologies used
4. Development methodology
5. Key results

Write this last.

---

6. Formatting Guidelines

Element	Requirement
Font	Times New Roman
Text Size	12 pt
Headings	14–16 pt (Bold)
Line Spacing	1.5
Margins	1 inch
Alignment	Justified
Page Numbers	Bottom right

---

7. Diagrams & Screenshots

Program	Recommended
MCA and MSc(DS):	20–40
BCA	15–25

Rules:
• Must be labeled

• Must be explained
• Must be clear (not blurred)

---

8. Common Mistakes to Avoid

• Copy-pasting GitHub code
• Submitting only theory (no working demo)
• No database explanation
• No testing chapter
• Unnumbered diagrams
• Dumping entire source code in main chapters

---

9. Final Submission Checklist

✓ Working project demo ready
✓ All UML diagrams included
✓ Source code attached
✓ Database schema included
✓ Plagiarism within university limit
✓ Guide approval signature
✓ PDF format submission
